linkedin.com/in/rohantaneja-dev | github.com/rohantaneja | rohantaneja.dev

Full-stack product engineer with 7 years of experience. Co-founder and CTO of MESO Lab, an AI lesson-planning product for schools that grew out of my research at Trinity College Dublin. Previously four years at Deloitte Ireland building platforms for financial-services and public-sector clients.

SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL, C#
- **Frontend:** React, owning product UI and UX end to end
- **Backend & data:** Node.js, REST APIs, Postgres, Supabase, data modeling, background jobs
- **AI:** LLM workflows with LangGraph, Vertex AI, AWS Bedrock, Hugging Face
- **Cloud & DevOps:** GCP, AWS, Azure, Docker, Kubernetes, GitHub Actions, CI/CD
- **Product & compliance:** PostHog analytics, Stripe billing, user interviews, GDPR, EU AI Act
- **Certifications:** AWS Solutions Architect – Associate; Azure Developer Associate

EXPERIENCE

Co-founder & CTO
May 2025 – Present

MESO Lab, Trinity College Dublin | Dublin, Ireland

- Built MESO's core IP as founding engineer: a curriculum-grounded engine that plans lessons and generates teaching content, plus the full web product around it.
- Launched to schools across the UK and Ireland, with teachers using it in their weekly planning.
- Shaped the roadmap with PostHog data and regular teacher feedback, shipping improvements quickly.
- Reused the engine to launch a second product that generates content for education publishers.
- Owned production as on-call engineer, including releases, monitoring, Stripe billing and multi-cloud consolidation to GCP.
- Met GDPR and EU AI Act requirements for public-sector procurement, with zero student personal data stored.
- Helped raise a pre-seed round backed by Enterprise Ireland, then hired and led a team of researchers.

Stack: TypeScript, React, Node.js, Python · Postgres, Supabase · GCP, AWS · LangGraph · Stripe, PostHog

Research Fellow
May 2025 – September 2026

ADAPT Centre, Trinity College Dublin | Dublin, Ireland

- Researched AI for lesson planning and built the first working prototype in Python.
- Designed quality checks to catch off-curriculum AI-generated content before it reached teachers.
- Trialed the prototype with teachers in real classrooms; the results became the basis for MESO.

Stack: Python, Hugging Face, Pandas, Jupyter

Senior Software Engineer, Engineering, Data & AI
September 2021 – August 2025

Deloitte Ireland LLP | Dublin, Ireland | Promoted: Analyst 2021, Consultant 2023, Senior 2024

- Cut manual document processing by 97% by building document-identification and fraud-detection models.
- Improved detection of incorrect records by 73% by adding machine-learning models to Azure data pipelines.
- Delivered full-stack .NET platforms (backend, REST APIs and UI) for financial-services and public-sector clients.
- Sped up releases by setting up automated testing (NUnit, SpecFlow) and CI/CD on Azure DevOps and Jenkins.
- Led GitHub Enterprise adoption and the GitHub Copilot rollout across Deloitte Ireland teams as platform owner.
- Founded and led the Software Engineering Community of Practice, running workshops and mentoring junior developers on secure coding and code review.

Stack: C#, .NET Core, ASP.NET · Azure, Docker, Kubernetes · SQL Server · Azure DevOps, Jenkins

Software Engineer Intern
June 2021 – September 2021

Fonz Music | Dublin, Ireland

- Removed a user-management bottleneck by rebuilding API data access with an ORM layer.
- Reduced runtime errors by migrating the codebase to TypeScript and adding structured error handling.
- Made builds consistent across environments by containerizing the service with Docker on AWS.

Stack: TypeScript, Node.js · AWS, Docker · Git

EDUCATION

B.A.I. Computer Engineering, First Class Honours (71%) 2017 – 2021

Trinity College Dublin

Relevant Modules: Data Structures and Algorithms, Operating Systems, Cloud Computing, Deep Learning

Memberships: DUCCS (Dublin University Computer Science Society), DU Pirate & HackTrinity

AISSCE (93.2%, equivalent to Irish Leaving Certificate) 2017

Blue Bells Model School

PROJECTS

- **Consent Right:** Browser extension that gives users control over cookie consent pop-ups and blocks dark patterns designed to push them into sharing data, built to GDPR consent rules. (GDPR, Browser Automation)
- **Document Management Services:** Document-upload integration that reduced manual work in client services and reached 70,000+ users in its first week. (ASP.NET, MVC, Agile)
- **CollaBiz:** Cross-platform retail collaboration app with inventory management and resource tracking, built in a 72-hour hackathon. (React Native, Node.js, IBM Cloud)
